

2008**Sense and Sustainability - School Version**

Educational film, 2008, 36 minutes

Directed by Johannes Bünger, commissioned by Sharp European Headquarters

This information film is divided into six chapters. These chapters are explaining and illustrating photovoltaic technology to a diverse but mainly young audience in a basic and entertaining way. Language and images are kept in a high-value, committed and optimistic style. The film contains an unmistakable message, i.e. the invitation to use solar energy.

2007**Looking for a Future Worth Living**

Information film, 2007, 28 minutes

Directed by Ephraim Broschkowski, commissioned by Prokon Unternehmensgruppe

Since more than 10 years the PROKON groups shows new economical solutions to create a future worth living. The company is market leader now. It acts from ecological capital investments to planning, financing and the business of wind energy, the change to cars driving with vegetable oil and the planning and building of fermentation plant. It supports social projects in Eastern European and African countries. Information film the economical and ecological wide spread activities.

The wind is our way

Information film, 2007, 28 minutes.

Directed by Johannes Bünger, commissioned by Ostwind GmbH

The small town Fruges in the economically underdeveloped Northern France faces big problems: it dies. Unemployment and a lack of sparetime activities lead to an exit of young people. Until the mayor has a good idea: He wants to make the region prosperous by investing in Renewable Energies.

The gift of Hawaii – Deep Ocean

Information film, 2007, 10 minutes

Directed by Johannes Bünger and Carl-A. Fechner,
in commissioned by Deep Ocean Hawaii (DOHAWAII)

The Gift of Hawaii depicts the worldwide beginning of the harvest of deep-sea water through DOHAWAII in Honolulu. Impressive photography show: this is a technology that

works. CEO Rudi Ahrens together with Executive Vice President Rich Treadway takes a motor boat out into the ocean and there photographs the deep-sea water harvesting technique especially designed and patented by DOHAWAII. This apparatus is located on a tugboat owned by the company.

OCEES –

Leading the Global Energy Transition to Ocean Thermal Resources

Information film, 10 minutes, commissioned by Ocean Engineering & Energy Systems (OCEES)
Directed by Johannes Bünger and Carl-A. Fechner

Vision 2030: Energy Efficiency

Trailer, 6 minutes, commissioned by dena (German Energy Agency, Berlin)
Directed by Ephraim Broschkowski

Renewable Energies for Economic Growth

Feature, 8 minutes, commissioned by IKEE (Information Campaign Renewable Energies)
Directed by Ephraim Broschkowski

All-rounder Bioenergy

Feature, 8 minutes, commissioned by IKEE (Information Campaign Renewable Energies)
Directed by Ephraim Broschkowski

Solutions! – Best of fechnerMEDIA Shorts

11 Short-films, between 2 and 10 minutes, commissioned by fechnerMEDIA:Publishing
Directed by Carl-A. Fechner, Johannes Bünger and Ephraim Broschkowski

Directed by Johannes Bünger

2005**Growing Energy on Farms**

Documentary, 31 minutes, commissioned by VRD Energy Foundation
Directed by Carl-A. Fechner and Cornelia Wiese

The European agriculture is suffering a crisis! But there is large new potential in cultivating renewable resources and energy plants. This opens up a whole new market beyond food production. The film „Growing Energy on the Farm“ shows the advanced possibilities that lie in the conversion of agricultural enterprises to biogas farms – now completely without liquid manure.

Renewables Made in Germany

Corporate film, 6 x 10 minutes, Documentary, 60 minutes,
commissioned by dena (German Energy Agency)
Directed by Johannes Bünger and Carl-A. Fechner

Renewable Energies

Trailer, 20 minutes, commissioned by IKEE (Information Campaign Renewable Energies), Directed by Johannes Bünger and Carl-A. Fechner

2004**Into the Heart of the Future**

Docudrama, 43 minutes, by order of the German Council for Sustainable Development, Berlin
Directed by Andreas Bechtold and Carl-A. Fechner

Growing Energy on Farms

Documentary, 30 minutes, commissioned by VRD
Directed by Cornelia Wiese and Carl-A. Fechner

Award: Ekotopfilm 2004, Bratislava, Prize of the Slovakian Minister of Environment

2003**Systematic Ecofarming**

Feature, 30 minutes, commissioned by aid Information Service for Consumer Protection, Food and Agriculture, Directed by Cornelia Wiese and Carl-A. Fechner

Natural, Safe, Comfortable

Feature, 23 Min., commissioned Ritter Umwelt- und Energietechnik
Directed Carl-A. Fechner and Annika Schroeter

2002**Agenda Visions**

Documentary, 35 minutes, commissioned by Deutsche Umwelthilfe
Directed by Cornelia Wiese

A film about sustainability in German cities and towns, about ways of measuring it and taking action for it. The film portrays the winners of the competition „sustainable communities of the future“. The film shows ideas and solutions and gives a platform to those who have shown models for action.

Building With Natural Resources

Documentary, 32 minutes, commissioned by Agency for Renewable Resources
Directed by Annika Schroeter

„The material will not last, it is inflammable, it will rot away – you just can't use it for building“ – these are only some of the prejudices against building houses with renewable resources. This film shows that they are wrong. A film about building houses for human beings in a humane and considerate way and about the individuals who stand up for this idea.
